README.md 2/18/2021

## Imitation-learning-project

## **Updates**

Feb 18- IL code base is available. Refer to README and start programming.

Feb 16- Proposal is complete. Midterm report due March 10.

## **General Outline**

The project aims to solve/build a single research idea by balancing its theory with empirical evaluation. We hope to begin by gaining intuition about the problem and addressing it on a simple toy task. The method can then be extended to non-trivial robot control tasks in order to compare its efficacy with baseline algorithms.

A longer list of papers is available here.

## **Tentative Schedule**

Week	Task	Description	Completed
1	Literature Review	Brainstorm Ideas and jot down good ones	<b>√</b>
2	Literature Review	Brainstorm Ideas, Meet with prof	<b>√</b>
3	Formulate Problem	Setup the problem with potential solutions	<b>√</b>
4	Implement Toy Problem	Solve base case and gain intuition	<b>√</b>
5	Implement Toy Problem	Complete base case solution and interpret results	-
6	Implement Algorithm	Solve main problem	-
7	Implement Algorithm	Solve main problem	-
9	Accumulate Results	Interpret and finalize results	-
10	Write Report	Draft and finalize report	-
11	Wrap Project	Package code base and wrap ppt	-
